

< activity04 />

During Class

Activity04 during class

1. Create a web page with personal information and portfolio of projects.

2. Create a personal Git hub pages : <https://<user>.github.io/personal/>

Ex: <https://github.com/sarfarazmohammed880/personal/>

2. Create a personal Git hub pages :

`https://<user>.github.io/personal/`

A step-by-step guide to Git web pages

Step 1: Create a GitHub account

<https://github.com/>

I recommend using
your personal email ...

If you already have a GitHub account : [login](https://github.com/login)

<https://github.com/login>

The screenshot shows the GitHub login page in a web browser. The browser's address bar displays 'github.com/login'. The page features the GitHub logo at the top, followed by the heading 'Sign in to GitHub'. Below this, there are input fields for 'Username or email address' and 'Password'. A 'Forgot password?' link is positioned next to the password field. A prominent green 'Sign in' button is centered below the input fields. Underneath the button, the text 'or' is displayed, followed by two buttons: 'Continue with Google' and 'Continue with Apple'. At the bottom of the main content area, there are links for 'New to GitHub? Create an account' and 'Sign in with a passkey'. The footer contains a list of links: 'Terms', 'Privacy', 'Docs', 'Contact GitHub Support', 'Manage cookies', and 'Do not share my personal information'.

Create repository

– personal

Create a new repository – **personal**

A repository is like a place or a container where something is stored.

In this case we're creating a Git repository to store **code**.

New repository

The screenshot shows the GitHub 'New repository' page. The browser address bar is 'github.com/new'. The page title is 'Create a new repository'. Below the title, it says 'Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository.](#) Required fields are marked with an asterisk (*).

The form is divided into two sections: '1 General' and '2 Configuration'.

1 General

- Owner ***: A dropdown menu showing 'sarfarazmohammed880'.
- Repository name ***: An empty text input field.
- Description**: An empty text input field with a character count '0 / 350 characters'.

2 Configuration

- Choose visibility ***: A dropdown menu showing 'Public'.
- Add README**: A toggle switch set to 'Off'.
- Add .gitignore**: A dropdown menu showing 'No .gitignore'.
- Add license**: A dropdown menu showing 'No license'.

At the bottom right, there is a green button labeled 'Create repository'.

The new repository will be under the name you just created:

<https://github.com/sarfarazmohammed880/personal>

The screenshot shows the GitHub 'New repository' page. A green arrow points from the word 'personal' in the text above to the 'Repository name' field, which contains 'personal'. Another green arrow points from the word 'Public' in the text above to the 'Choose visibility' dropdown, which is set to 'Public'. A third green arrow points from the word 'README' in the text above to the 'Add README' section, which has a blue 'X' icon next to it. The 'Add README' section also has a toggle switch set to 'On'. The 'Add .gitignore' and 'Add license' sections are also visible.

github.com/new

New repository

Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

- General**
 - Owner * sarfarazmohammed880
 - Repository name * personal
personal is available.
 - Description
0 / 350 characters
- Configuration**
 - Choose visibility * Public
Choose who can see and commit to this repository
 - Add README
READMEs can be used as longer descriptions. [About READMEs](#)
On ☒
 - Add .gitignore
.gitignore tells git which files not to track. [About ignoring files](#)
No .gitignore
 - Add license
Licenses explain how others can use your code. [About licenses](#)
No license

Create repository

Public

README

Add your personal web page to the repository `personal` in Github.

Drag files from to repository

personal :

GitHub repository page for 'personal' by user 'sarfarazmohammed880'. The repository is public and contains files: images, README.md, images.zip, index.html, and styles.css. An orange arrow points from the 'images.zip' file in the file list to the 'images.zip' file in the file explorer on the right.

File	Commit	Time
images	Add files via upload	18 minutes ago
README.md	Initial commit	4 hours ago
images.zip	Add files via upload	18 minutes ago
index.html	Add files via upload	18 minutes ago
styles.css	Add files via upload	18 minutes ago

Windows File Explorer window showing the contents of a folder named '03_2_Basic0_HTML_CSS_Portfolio'. The folder contains: images, images.zip, index.html, and styles.css. An orange arrow points from the 'images.zip' file in the file explorer to the 'images.zip' file in the GitHub repository page on the left.

Name	Status	Date modified	Type	Size
images	✓	1/31/2026 11:24 PM	File folder	
images.zip	✓	1/31/2026 11:47 PM	Compressed (zipp...	37 KB
index.html	✓	2/1/2026 12:01 AM	HTML File	4 KB
styles.css	✓	2/1/2026 12:02 AM	CSS Source File	1 KB

Set up your web page:

Pages

1

Settings

3

Save

If you have configured **GitHub Pages** you can get your public URL like this:

`https://<username>.github.io/personal/index.html`

e.g.,

`https://sarfarazmohammed880.github.io/personal/index.html`

Show your Web page: [https://sarfarazmohammed880.github.io/personal/index.html](https://sarfarazmohammed880.github.io/personal/)

For this Activity upload to Canvas:

- Portfolio URL e.g., <https://sarfarazmohammed880.github.io/personal/index.html>
- and files: index.html, style.css and folder with images
